

Covid-19 Policy

Version: October 2023

General Information

There has been a full return to netball competition, and we can now play in indoor and outdoor leagues and competitions without restriction.

Whilst the Government removed the legal requirement to self-isolate if testing positive, we are encouraged to take personal responsibility concerning COVID-19, and self-isolation is still recommended.

Therefore, if you test positive or display symptoms of COVID-19, you should not attend Spires netball activity.

What does this mean for netball?

England Netball recommends the Netball Family maintain best practice and so for Spires we will continue to utilise many elements of our previous COVID-19 guidance. This should help keep the transmission of COVID-19 and other infectious diseases to a minimum.

England Netball core guidance

1. Anybody who has tested positive or is displaying symptoms of COVID-19 should not attend netball activity. We will share this guidance with all members and players and parents.
2. Sanitisation of hands and equipment should continue.
3. Risk Assessments and Risk Mitigation plans should continue to be completed for any activity – these should continue to cover the risk of COVID-19 and its spread during netball activity. Any existing Risk Assessments produced may still be relevant and can still be used.
